## KEY FINDINGS

The National LGBTQI Movement Report (NMR) series provides a comprehensive, annual snapshot of the financial health of many of the largest lesbian, gay, bisexual, transgender, queer, and intersex (LGBTQI) social justice organizations in the United States. These organizations generally focus on either broad LGBTQI advocacy, issue-specific advocacy, legal advocacy, or research and public education about LGBTQI people and issues.

Amid the ongoing COVID-19 pandemic, the NMR series remains particularly important. Since the onset of the pandemic, MAP has conducted surveys of leading LGBTQI organizations regarding the impacts of COVID-19, including the 2021 NMR report that assessed the first full fiscal year under COVID-19.<sup>1</sup> This year's report shows the ongoing impacts of COVID-19, including that, while participating organizations ended the fiscal year with relatively strong overall financial standing, there are important emerging trends in specific revenue streams and fundraising. Additionally, these financially-focused data do not necessarily reflect the many tremendous challenges facing many organizations and their staff, including ongoing impacts to staff mental and physical health.

This annual report shows key financial trends and benchmarks in these major areas:

- Revenue & Expenses
- Financial Trends
- Indicators of Financial Health
- Fundraising
- Staff
- Boards

Note that because different organizations participate from year to year, readers should not compare findings in this year's report to those in previous years' reports. Instead, readers can find historical comparisons within this and each report, as participating organizations are asked to provide both current and past years' data whenever possible.

<sup>1</sup> For additional research on the impact of COVID-19 on LGBTQI movement organizations, including on movement staff and mental health, see MAP's ongoing research at [www.mapresearch.org/covid-19](http://www.mapresearch.org/covid-19).

## Revenue & Expenses: Shifting Patterns

- Across 36 participating organizations, **combined 2021 revenue** totaled \$386 million, exceeding combined 2021 expenses (\$267 million) by roughly \$119 million—a dramatically higher differential than pre-2020, though this may be at least partly due to government support during the pandemic.
- From 2020 to 2021, organizations reported **mixed patterns in different sources of revenue, with some increasing and some decreasing by significant margins**. For example, revenue from fundraising events, in-kind contributions, and corporate contributions all declined sharply, while revenue from other sources like individual contributions and foundations increased. This highlights the continually changing landscape for movement organizations' funding and revenue stability, particularly as practices around in-person fundraising events continued to evolve during the second year of the pandemic.
- **Individual donations** comprise the largest share (41%) of organizations' 2021 combined revenue.
- The majority (78%) of organizations' **combined 2021 expenses** were spent on programs and services, with 11% spent on management and general costs and the remaining 11% on fundraising.

## Indicators of Financial Health

- All organizations that provided five-year trend data report a five-year average **liquidity ratio** above one, meaning all organizations have consistently maintained enough cash and liquid assets on hand to at least cover their current financial obligations. In fact, nearly two-thirds (66%) of organizations report a five-year average liquidity ratio over seven, meaning they can cover their liabilities more than seven times over with what they have on hand. This reflects a longer-term strength and consistency, at least at the aggregate level, that may help mitigate the impact of economic shocks such as the pandemic.
- Participating organizations reported an average of 483 days of **working capital** in 2021, a 15% increase from the previous year.

## Fundraising: Declines in Number of Donors, Though Total Revenue from Individual Donors Grew

- In 2021, responding organizations (n=28) reported a combined total of over 355,000 individual donors. The vast majority of these **individual donors** (97%) gave under \$1,000 in 2021, including nearly two in five donors (36%) who gave under \$35 in 2021. However, the revenue from these smaller-level donors accounted for only roughly 13% of revenue from individual donations; as might be expected, the large majority of revenue from individual donations came from donors giving at larger amounts.
- Among organizations that provided five-year trend data (2017 to 2021; n=27), the total number of donors was significantly impacted by COVID-19, and in this second year of the pandemic, the number of donors at nearly every size fell by significant margins.
  - From fiscal years 2017 to 2019 (i.e., pre-COVID), the number of **large donors** (\$25,000+ per year) increased by 5% and rose slightly in the first year of the pandemic. From 2020 to 2021, however, the number of large donors fell by 28%.
  - From 2017 to 2019, the number of **medium donors** (\$1,000-\$24,999 per year) increased by 5% and rose even further in the first year of the pandemic. From 2020 to 2021, however, the number of medium donors fell by 35%.
  - From 2017 to 2019, the number of **small donors** (\$35-\$999 per year) increased by 1%, but in 2020 fell by roughly 9%. From 2020 to 2021, the number of small donors slightly grew, by 1%.
  - Five-year trend data are not yet available for **micro donors** (<\$35 per year), but participating organizations reported a 23% decrease in these donors from 2020 to 2021.
- Despite these declines in the number of *people* donating, the **total revenue from individual donations** grew from 2020 to 2021, suggesting that individuals may be giving at larger amounts than in the previous year. Across organizations that provided the above trend data on donors (n=27), total revenue from individual donors grew 21% from 2020 to 2021.
- Among reporting organizations, the number of **individuals that attend fundraising events** was slightly declining (3%) from 2017 to 2019, but

then decreased 36% from 2019 to 2020 amidst the first year of the pandemic. From 2020 to 2021, the number of attendees again fell, this time by 80%. Importantly, this question asks specifically about fundraising events that cost at least \$100 per ticket or person to attend, focusing on larger scale events (e.g., galas). Therefore, this does not capture other types of fundraising events, including the types of events that have become more commonplace during the pandemic, such as virtual and smaller scale fundraisers. More research is needed to better understand how movement organizations are adapting fundraising efforts in the face of both continuing and new challenges such as these.

## Staff: Demographically Diverse in Race, Gender, & More

- Reporting organizations (n=31) employed a total of 969 paid staff in fiscal year 2021, 94% of whom are full-time workers. The **average staff size** at participating organizations is 25 staff, and the median is 20. Staff size ranges from a low of two to a high of 210.
- Not all organizations reported staff demographics. Among those that did:
  - Organizations reported **racially** diverse staff, with 50% of all staff and 42% of all senior staff being people of color. Among all staff, 18% are Black or African American, 15% are Hispanic or Latino, 8% are Asian or Pacific Islander (API), 4% are multi-racial, 1.2% are Native American, and 3% identify as another race or ethnicity.<sup>2</sup>
  - Organizations reported that 48% of all staff identify as women, 37% as men, 10% as nonbinary, and 5% as genderqueer or another **gender identity**.
  - Organizations reported that 16% of staff and 12% of senior staff identify as **transgender**. Nationally, an estimated 0.5% of the adult population identifies as transgender.<sup>3</sup>

<sup>2</sup> According to the U.S. Census Bureau, in 2021, people of color comprised 40.7% of the U.S. population. This includes 13.6% who were Black or African American alone, 18.9% who were Hispanic or Latino, 6.4% who were Asian or Pacific Islander alone, and 1.3% who were Native American alone.

<sup>3</sup> Jody Herman, Andrew Flores, and Kathryn O'Neill. June 2022. *How Many Adults And Youth Identify as Transgender in the United States?* Los Angeles, CA: The Williams Institute.

## Boards: Demographically Diverse, Though Less So Than Staff

- Reporting organizations (n=31) reported a total of 551 board members, with an **average board size** of 18 members and a median of 15. The smallest board is comprised of six members, and the largest of 49.
- Among organizations that reported demographic about their boards:
  - Boards are less **racially** diverse than staff: 50% of staff are people of color, compared to 43% of board members and 45% of executive board members. In particular, board members are much less likely than staff to be Hispanic or Latino, or Native American.
  - Overall, 47% of board members identify as men, 47% as women, 3% as nonbinary, and 2% as genderqueer or another **gender identity**. Boards have significantly fewer members who are nonbinary, genderqueer, or another gender: 15% of all staff are nonbinary, genderqueer, or another gender, as are 11% of senior staff, but these numbers drop to 5% among boards and 4% among executive boards.
  - Nine percent (9%) of board members and 8% of executive board members identify as **transgender**.

# 2022 NATIONAL LGBTQI MOVEMENT REPORT

## A FINANCIAL OVERVIEW OF LEADING ORGANIZATIONS IN THE LGBTQI MOVEMENT

### METHODOLOGY

The Movement Advancement Project (MAP) invited organizations to participate based on their size, importance to the overall LGBTQI movement, and collective coverage of LGBTQI issues and constituencies. Of the 36 that chose to participate, most participating organizations (32) have budgets over \$1 million; four organizations have smaller budgets but are national leaders working in areas of critical concern to the LGBTQI movement.

MAP collected standardized financial and operations information from participating organizations and summarized key information across participants. This report provides aggregated data across participating organizations, with most figures and charts showing data for all organizations combined. Where figures or charts reflect data based on a subset of participating organizations, this is noted.

**36 PARTICIPANTS, TOTAL 2021 REVENUE = \$385.8M, TOTAL 2021 EXPENSES = \$267.3M**

### PARTICIPATING LGBTQI ORGANIZATIONS ARE COMPRISED OF ADVOCACY, ISSUE, LEGAL, AND RESEARCH & PUBLIC EDUCATION ORGANIZATIONS

(n=36)

**Advocacy organizations** advocate for the entire LGBTQI community or a particular subset of the LGBTQI community on a broad range of issues.

**Issue organizations** advocate for the entire LGBTQI community or a particular subset of the LGBTQI community on a particular issue or related set of issues.

**Legal organizations** provide legal services to LGBTQI people and advocate and/or litigate within the legal system for LGBTQI people.

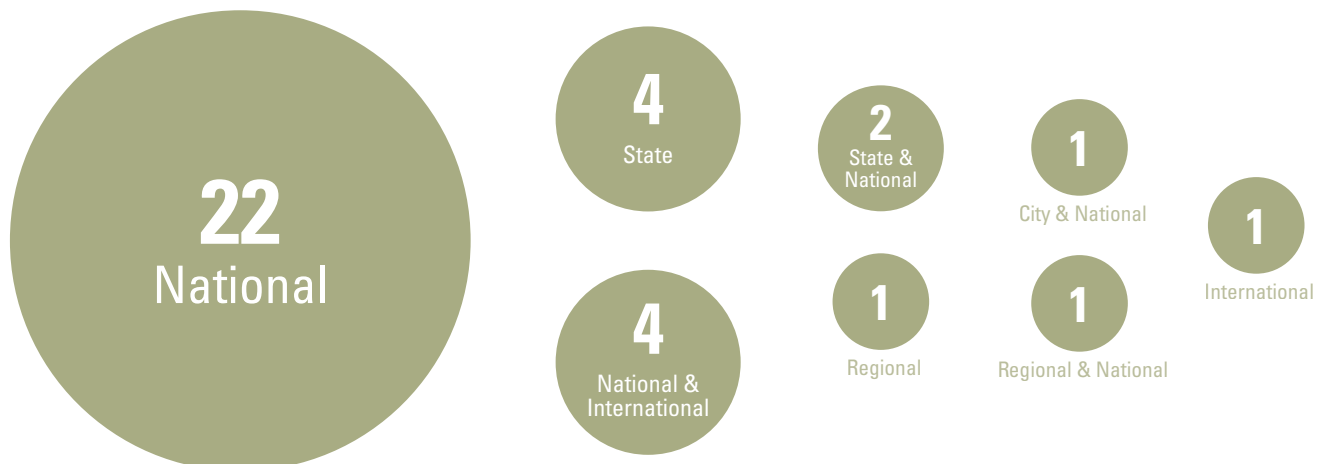

**Research and public education organizations** provide the LGBTQI community and the broader public with information about the issues facing the LGBTQI community. They may provide research or policy analysis, or educate the public through media work.

Note: May not sum to 100 due to rounding

### THE MAJORITY OF PARTICIPATING ORGANIZATIONS FOCUS ON NATIONAL LGBTQI ISSUES

Note: Many organizations noted more than one focus, as shown below.

Note: Participating organizations in this survey vary from year to year. Because of the change in participants, this report's figures, charts, and numbers should not be compared to those in previous reports. This year's numbers and analyses (including multiple-year trends) reflect data exclusively for this year's participating organizations.

### FINANCIAL TRENDS

This graphic examines the financial capacity of LGBTQI movement organizations from 2017 through 2021. At the end of the 2021 fiscal year, participating organizations as a whole remain well-resourced and supported by a diverse range of revenue sources, but in the second year of the COVID-19 pandemic, fundraising income continued to decline, while corporate and in-kind giving newly declined. Note: on this page, some analyses required data from previous years. Only organizations that provided data for all years in the relevant analysis are included. Note also that, where applicable, percentages may not sum to 100 due to rounding.

### INDICATORS OF FINANCIAL HEALTH

This section examines several key indicators of financial health for leading organizations in the LGBTQI movement. Indicators of financial health measure the average financial stability of participating organizations, including liquidity ratio, days of working capital, and daily cash expense. Liquidity ratio measures cash and investments on hand to cover current financial obligations such as accounts payable and lines of credit. Average days of working capital is the measure of an organization’s cash reserves, shown as the average number of days an organization could meet all its expenses using only its current reserves. Note: on this page, some analyses required data from previous years. Only organizations that provided data for all years in the relevant analysis are included. Note also that, where applicable, percentages may not sum to 100 due to rounding.

## FUNDRAISING AND FUNDRAISING EFFICIENCY

Like most other nonprofits, participating organizations rely on fundraising to generate a significant portion of their revenue. This section includes analysis of top contributor trends, fundraising costs, fundraising from individual donors, and more. Note: on this page, some analyses require data from previous years. Therefore, only organizations that provided data for all relevant years are included.
