

HOW DOES AUTOMATED VERIFICATION & REGISTRATION WORK?

MEET JANE VOTER. Jane just moved across town to a new home and needs to get a new driver's license.

JANE GOES to the motor vehicle registry and completes the paperwork to update her new driver's license and voter registration information. At the DMV, she fills in her name, address, birth date, and citizenship status.

IN FIVE EASY STEPS, JANE'S VOTING ELIGIBILITY IS VERIFIED AND SHE IS REGISTERED TO VOTE AT HER NEW ADDRESS

1

Jane's information is transmitted from the DMV to election officials.

2

Election officials check Jane's information against other databases to verify her eligibility to vote:

- ✓ NAME
- ✓ AGE
- ✓ RESIDENCY
- ✓ CITIZENSHIP
- ✓ OTHER ELIGIBILITY REQUIREMENTS

3

Having completed the security check and voting eligibility/verification process, the election office sends a postcard to Jane's house.

4

Jane can:

- ✓ Confirm registration status online
- ✓ Add her party affiliation (in some states)

OR

- ✓ Fix any incorrect information
- ✓ Choose to decline the registration

5

Jane is registered to vote in the next election.
